

Industrial Hygiene and Safety

BHE's staff of certified professionals provide Industrial Hygiene and Safety Services to a wide range of industrial, educational, health care, commercial, and government clients throughout the United States. These services include audits, investigations, monitoring, and specialized services aimed at helping our clients provide their employees and customers a safe, productive, and healthy workplace. The BHE industrial hygiene and safety audit is designed to measure a company's performance in relation to Occupational Safety and Health Administration (OSHA) or other relevant standards. The client's operation is examined for a variety of factors including regulatory compliance, accident statistics, record keeping, management commitment and support, imminent hazards, required written programs and company policies, and general facility conditions.

BHE is also well versed in the performance of safety and industrial hygiene investigations to identify potential hazards before they affect employees or operations. These investigations may be toxicological reviews; occupational noise assessments including modeling, abatement and design; process safety management studies, air sampling and analyses, machine guarding, and general workplace safety and health assessments. After the investigation and at the client's request, we can also develop effective management strategies to minimize the risk potential.

SERVICES INCLUDE:

- + OSHA Compliance Audits
- + Development and Implementation of OSHA Safety and Health Programs (Hazard Communication, Respirator Protection, Confined Space, etc.)
- + Occupational Exposure Assessments
- + Evaluation of Hazard Control Methods
- + Hazardous Materials Management Strategies, Remedial Design, and Technical Support Services (Asbestos, Lead, PCBs, Mercury)
- + Noise Monitoring, Assessments, Modeling, Barrier Design and Control
- + Health and Safety Training Programs
- + Accident Investigations, Job Safety Analysis, Risk Assessments
- + Indoor Air Quality Investigations, Monitoring, and Testing
- + Pre-Renovation/Demolition Asbestos and Lead-Based Paint Surveys and Hazard Assessments
